EDUCATION

Amrita Vishwa Vidyapeetham Coimbatore, Tamil Nadu

Bachelor of Technology, Computer Science and Engineering [CGPA:7.85] *Aug 2023 – July 2027*

EXPERIENCE

Pragati'26 | Amrita School of Business Jan 2026 – Feb 2026

Software Developer · Lead · Full-Time [Pragati26]

- Led a 10-member dev team to ship Pragati 2026 end-to-end, managed sprint planning, coordinated with organizers, and delivered registration, payment, and event management modules on schedule.
- Integrated PayU payment gateway with webhook validation and failure-handling, ensuring zero duplicate transactions during peak registration traffic.
- Managed production infrastructure with reverse proxies and Grafana + Prometheus monitoring, maintaining uptime throughout live event operations.

Anokha 2026 | Amrita Vishwa Vidyapeetham Dec 2025 – Jan 2026

Software Developer · Full-Time [Anokha]

- Built the primary public-facing site for Anokha 2026, handling peak concurrent registrations for 5,000+ participants across 100+ events with a fully responsive UI.
- Built and maintained organizers and admin panels, enabling 100+ organizers to manage 5,000+ participant registrations, approvals, and event workflows across multiple departments.
- Deployed and monitored production servers using Grafana dashboards; maintained uptime throughout live registration windows and event day traffic spikes.

Association for Computing Machinery (ACM) | Amrita Nov 2024 – June 2025

Full Stack Developer · Part-Time ***[Github]***

- Led development of two open-source contribution platforms (Winter of Code & Summer of Code) serving 1,000+ users and tracking activity across 100+ GitHub repositories.
- Built a real-time leaderboard using Server-Sent Events, delivering sub-second updates to 1,000+ concurrent users without polling overhead.
- Architected the frontend with React, Zustand for global state, and GitHub OAuth; configured Redis caching on the backend and containerized the full dev environment with Docker.

PROJECTS

Interview-AI | *Next.js, Express.js, Node.js, PostgreSQL, Clerk, Gemini API.* **[GITHUB]**

- Developed Interview AI using Gemini APIs for role-specific questions and AI-driven webcam/audio feedback.
- Built with Next.js, TypeScript, Node.js, and Express.js, integrating Clerk for secure auth and Neon PostgreSQL for scalable storage of 1,000+ interview sessions.

LeetPath Chrome Extension | *React, TailwindCSS, Firebase, Flask, Express.js.* **[GITHUB]**

- Designed a Chrome extension for a LeetCode recommendation platform with personalized problem suggestion.
- Established synchronized login with Firebase, enabling real-time progress syncing between the website and extension.

ACE Club Website | React.js, Next.js, Recoil, TailwindCSS, ShadCN. **[GITHUB]**

- Built ACE club website and admin panel using React, enabling admins to manage events for 1,000+ users.
- Implemented real-time ticketing system with QR code generation and scan validation.

TECHNICAL SKILLS

Programming Languages: Java, Python, Go, TypeScript

Libraries and Frameworks: Next.js, React.js, TailwindCSS, Node.js, Express.js, Flutter, React Native, Tanstack, Framer Motion, Gin, Elysia, Flask, Zustand.

Tools and Technologies: AWS, Google Cloud, Grafana, Prometheus, Docker, PostgreSQL, MySQL, Redis, Drizzle, Supabase, Firebase, Bruno, ELK Stack, Vim, Linux, Langchain, MCP, Snowflake.

Domains: Software Engineering, Cloud Computing, DevOps, Distributed Systems, System Design, Server Management, Data Structures & Algorithms, Full Stack Development, Database Management Systems, AI Engineering.
